

Cable sleeves type KM

The installation of cable sleeves of type KM is quite simple and can be done without any tools. The sleeves are closed off by joining the upper and the lower parts and engage in a secure manner during said process.

1. Klappgehäuse
2. Schimverbindung
3. Handschuh
4. Befestigungsnagel
5. Befestigungsübel/Schrauben (2x)
6. Reduktion (KHII)
7. Zugentlastung
8. Kabelbinder (2x)
